

## Problem Statement

- Universities have no direct policies to address the use of AI technologies.
- Plagiarism software does not detect AI-produced writing.
- Because AI-produced writing creates original content, there is a debate about if it is equal to plagiarism.

## Theoretical Framework

- Organizational theory will create a framework to evaluate policy on AI technology. The policies Rowan University is currently employing are academic integrity and academic freedom.

### Policy Analysis Using Organizational Theory

## Research Question

**Examining the shared governance process, what policies are being created by Rowan University to address the application of AI Technologies?**

## Research Design

- Qualitative
- Policy Analysis
- Stakeholders
  - Cross- Disciplinary Faculty
  - Leadership
- Data Collection
  - Surveys
  - Interviews
  - Focus Groups
- Analysis Methods
  - Coding
  - Establishing Themes
- Interpret Data

### Research Design

## Significance

- The power of AI technologies like ChatGPT is not yet known and it is imperative that institutions of higher education establish guidelines for faculty and students.
- Universities all over the world are experiencing the same trepidation for the technology.
- As AI improves, it is harder to detect.
- Faculty and Students need to understand the limitations of the technology.
- Developing a policy to guide the use of this powerful tool is paramount.
